WORK EXPERIENCE

MAR 2022

UX Designer

- RECENT

Synology Inc. | New Taipei, Taiwan

- Executed user research that secured US\$600,000 annually for Calendar mobile & web development resources, effectively addressing longstanding usability issues
- Integrated AI into the MailPlus Web and Mobile, focusing on providing a seamless, intuitive, and consistent user experience
- Built a payment system into the NAS cloud-powered monitoring platform, resulting in at least US\$400,000/year

MAR 2019

UI/UX & Front-end Designer

- DEC 2021

Ubiqconn Inc. | Remote (Based in Taipei, Taiwan)

- Lead product design for IoT device management (desktop), RuggOTA (Android & Windows)
- Improved usability by over 30% by designing dashboard and onboarding pages based on research results for a new product released to the market
- Implemented UI components into the Vue framework code (Vue, Vuetify, CSS) and worked closely with engineers to ensure the design quality
